Professional Summary

Mathematics and Computer Science student with hands-on experience building backend and full-stack applications using Node.js, Express, MongoDB, PHP (Laravel), and JavaScript. Experienced in developing REST APIs, authentication systems, routing, and database integration. Passionate about problem-solving and writing clean, scalable backend code. Seeking a Junior Backend Developer role to contribute to real-world systems and grow in API and server-side development.

Skills

Languages: JavaScript, PHP, SQL

Backend: Node.js, Express, MongoDB, Laravel

Frontend: React, HTML, CSS, Tailwind

Tools & Platforms: Git, GitHub, Postman, Docker

Projects

Twitter Clone (React, Node.js)

- Built a full-stack social media application with user authentication and protected routes
- Implemented backend APIs for posts, users, and interactions

Applicant Tracking System – ATS (PHP, Laravel, MySQL)

- Developed backend logic for managing job applications and user roles
- Designed database schemas and implemented CRUD operations

Amazon Clone (JavaScript)

- Built core application features including product listings and cart functionality
- Focused on application logic and state management

Education

● Kenyatta University

Bachelor of Science in Mathematics and Computer Science

2022 – 2026

● Chinga Boys High School

Kenya Certificate of Secondary Education – Grade B

Extras (Relevant Additions)

- **Version Control:** Active use of Git and GitHub for project management

- **API Development:** Experience testing and documenting APIs using Postman
- **Databases:** Comfortable with schema design and queries using MongoDB & SQL
- **Learning Focus:** Backend architecture, authentication, and scalable systems
